8 Button Functions

The main button is used to control the EL-IOT's functions, some of which also create an audit event that can be viewed using the EasyLog Cloud App or website.

Button Press	Short Press < 1s	Long Press > 1s-8s	Press & Hold > 8s
Function	Mutes the alarm sounder	Acknowledges an alarm, creates an audit event in the record, forces data synchronisation with the Cloud	Activates Configuration mode to reconnect with the App

9 Getting to know your EL-IOT data logger

- Data logger functioning indicator
- Alarm indicator
- Battery low indicator
- WiFi functioning indicator
- Main button
- Mains power socket*
- External probe socket
- Battery compartment
- Reset button

*Mains power supply sold separately

10 Indicators and Sounder

The EL-IOT has four indicators and a sounder to clearly show its current status. The sounder is active whenever there is an alarm.

Indicator	Flashing	Flashing	Battery Low	WiFi Active	Flashing
Status	Device in operation, no alarms or warnings	Alarm / Memory Full / Calibration Expired	Battery Low	WiFi Active	WiFi set up mode / not set up yet

11 Important Safety Information

WARNING: Failure to follow these safety instructions could result in fire, electrical shock, other injury or damage.

Repairing or modifying
 Never attempt to repair or modify this product. Dismantling, may cause damage that is not covered under the warranty. Servicing should only be provided by an approved supplier. If the product has been punctured, or seriously damaged do not use it and return it to an approved supplier.

Power supply
 Only use 1.5V AA alkaline batteries or a genuine EL-IOT power supply to power your EL-IOT data logger. Power supply sold separately.

Disposal and recycling
 You must dispose of this product and batteries according to relevant laws and regulations. This product contains electronic components and therefore must be disposed of separately from household waste.

Caution: Do not leave product in direct sunlight. Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

EL-IOT
 Wireless Cloud-Connected Data Logger

Your data, anytime, anywhere

Quick Start Guide

1

Set up a Cloud Account

To begin setting up your EL-IOT, you first need an EasyLog Cloud account.

- Visit easylogcloud.com and click Sign Up Now
- Download the EasyLog Cloud App onto your phone or tablet

2

Remove the mounting bracket

Slide the mounting bracket upwards to detach it from the EL-IOT device.

3

Remove the back cover

Use a cross-head screwdriver to unscrew the 4 screws that secure the back cover of the device.

Once the screws are removed, lift the back cover to reveal the battery compartment.

4

Install the batteries

Insert 4 x AA batteries into the battery compartment, taking care to place the batteries in the correct orientation. The sounder will beep when the batteries are first inserted.

5

Connecting external sensor probe

If an external sensor probe was supplied with your EL-IOT, fit it to the PROBE socket. The screw must be fully tightened to ensure a good connection.

This must be done before you connect your EL-IOT to the Cloud.

6

Internal sensor

If no probe is fitted, your EL-IOT will automatically use the internal temperature sensor.

If you subsequently fit a probe, you will need to set the EL-IOT up on the Cloud again, as described in the next section.

7

Connect to and configure in the Cloud

Sign in to the EasyLog Cloud App on your mobile device. Select "Setup Device" from the burger menu and follow the on-screen instructions to configure your EL-IOT.

Once your EL-IOT is connected to your WiFi network and EasyLog account, replace the battery cover and wall mount bracket. Setup is now complete. Install your device in the location you wish to monitor.

You can now view the EL-IOT's data and change settings either in the EasyLog Cloud App or by visiting your account at:

www.easylogcloud.com
