

It has never been more important to ensure the quality and purity of your blood components and pharmaceuticals, as well as your all-important Covid-19 vaccinations. Help is at hand – EasyLog, the experts in medical storage condition monitoring, have a range of solutions to give you complete peace of mind.

Wireless data logging: EL-WiFi-VACX

These high accuracy WiFi temperature monitors can send text alerts straight to your phone.

Easy to use, they can be set up in minutes, providing you with fully automated monitoring across different storage areas or even different buildings. You have access to all your recorded data 24/7 from any internet-connected device, receiving instant notifications via email and text messages, meaning you and your team are aware the moment a problem occurs.

- Ideal for monitoring vaccines and other refrigerated pharmaceuticals
- Configurable alarms with on-board warning light and sounder
- Use your existing wireless network
- Data is encrypted and secure
- Rechargeable internal battery pack, or can be permanently powered
- Glycol probe and calibration certificate supplied with each device
- No need to remove devices from service for recalibration, just replace the probe

Temperature Monitoring Couldn't be Simpler

Automatic alerts straight to your inbox

Our Wireless Alert TP temperature monitor comes with a 1.5m probe meaning you can place the device somewhere where it's easily seen, and trail the probe in with your stored blood and pharmaceutical products. It's our simplest condition monitoring solution, perfect for providing instant alerts and as a back-up system to ensure no equipment failure or storage breach is ever missed.

- Temperature measurement range: -40°C to +125°C
- Probe length: 1.5m
- Set up in moments with our free Wireless Alert App
- Automatically send email notifications to your specified recipients
- Alarm light on each device shows if an alert is active

Did you know? The Wireless Alert DC model version is specifically designed to monitor door contact, so would alert you when a medical fridge or freezer door has been left open.

Money-Saving Entry Level Data Loggers

The simplicity of a stand-alone logger

Choose from an extensive range of EasyLog USB data loggers to ensure the temperature and humidity levels of your medical practices are kept in check. Each as easy to set up as the other, with the ability to store over 1 million readings, our family of USB loggers are discreet, accurate, and reliable, allowing you to receive the data you need to make the right decisions.

- Easy to configure USB data loggers with extra-long battery life
- Set your own high and low alarm levels – LEDs flash when alarm levels are breached
- Clear display that shows the latest, maximum and minimum readings
- Each logger can store 220 days' worth of data (depending on sample rate and temperature)
- Free software to configure your logger, download data, graph and analyse the results

Did you know?
EasyLog data loggers can be supplied with a calibration certificate, and EasyLog also provides an annual recalibration service

Are You Ready for Cryogenic Storage?

Sub-zero temperature data loggers

Because the Pfizer vaccine requires storage as low as -80°C , we have developed our existing wireless data loggers in order to monitor vaccines and other medicinal goods that need to be stored at very low temperatures. Many loggers available today are unable to measure temperatures as low as this.

EasyLog's range of thermocouple probe loggers is the perfect solution.

EL-USB-ULT-LCD

- Ultra-low temperature USB data loggers
- High-accuracy version available
- Can measure down to -100°C
- Stores over 32,000 readings
- 2-year battery lift
- Graph, analyse and download data with our free EasyLog software

The EasyLog Cloud is FREE for one device, and costs as little as £0.38 per month for additional loggers.

No matter what you need we have the data logging solution for you. Our wide range of data loggers can all be viewed on our website.

To order your loggers call us on **01794 884 567** or visit lascarelectronics.com.

Please also call us for technical help or to learn more about our other temperature and humidity monitoring products.
