

Following Best Practice Needn't be Time Consuming

The easy way to follow Green Book standards for vaccine and pharmaceutical storage

Using a data logger that automatically creates temperature audit records leaves your staff free to look after your patients, instead of pieces of paper. And when the same logger instantly tells you of any temperature breaches, you get absolute peace of mind.

EasyLog's range of data loggers meet or exceed all Green Book requirements.

Wireless data logging: EL-WiFi-VACX

These high accuracy WiFi temperature monitors can send text alerts straight to your phone.

Easy to use, they can be set up in minutes, providing you with fully automated monitoring across different storage areas or even different buildings. You have access to all your recorded data 24/7 from any internet-connected device, receiving instant notifications via email and text messages, meaning you and your team are aware the moment a problem occurs.

- Ideal for monitoring vaccines and other refrigerated pharmaceuticals
- Configurable alarms with on-board warning light and sounder
- Use your existing wireless network
- Data is encrypted and secure
- Rechargeable internal battery pack, or can be permanently powered
- Glycol probe and calibration certificate supplied with each device
- No need to remove devices from service for recalibration, just replace the probe

Available NOW for just

£189.95 Each

The EasyLog Cloud is FREE for one device, and costs as little as £0.38 per month for additional loggers.

Easy, Low Cost Monitoring: EL-USB-VAC

The EL-USB-VAC data logger is perfect for monitoring individual fridges.

- Set up in seconds using our free EasyLog software
- Coloured indicators show the logger is working correctly, and whether an alarm has been triggered
- Battery included, giving 2 years of uninterrupted service
- Glycol probe and calibration certificate supplied with each device

To check your measured data in detail, just plug the logger directly into your PC or laptop, and use the EasyLog software to graph, analyse and download the readings.

Did You Know? EasyLog data loggers automatically create the temperature records you need.

Available NOW for just

£135.95 Each

Simple, Low Cost Monitoring: EL-USB-ULT-LCD

Available NOW for just

£84.95 Each

The EL-USB-ULT-LCD data logger is designed for monitoring vaccines in dry ice storage, down to -100°C.

- Highly accurate temperature probe can reach inside insulated containers
- Coloured indicators show the logger is working correctly, and whether an alarm has been triggered
- Battery included giving 2 years of uninterrupted service

To check your measured data in detail, just plug the logger directly into your PC or laptop, and use our free EasyLog software to graph, analyse and download the readings.

WiFi Logger: EL-WiFi-ULT

Get critical vaccine condition monitoring text alerts straight to your pocket with our vaccine logger SMS functionality.

Cloud-connected wireless data loggers take just minutes to set up, providing fully automated monitoring across different storage areas or even different buildings. Your data is available 24/7 from any internet-connected device, and instant notifications via email and SMS messages mean you and your team are aware the moment a problem occurs.

- Measures down to -100°C
- Use your existing wireless network, data is encrypted and secure
- Rechargeable internal battery pack, and can also be permanently powered
- Supplied with glycol probe and calibration certificate

To simultaneously monitor two fridges or storage zones, the EL-WiFi-DULT connects two probes from one data logger.

The EasyLog Cloud is FREE for one device, and costs as little as £0.38 per month for additional loggers.

Available NOW for just

£139.95 Each

The EL-IOT-1 Wireless Data Logger

Wireless logging is easier and cheaper than ever with the new EL-IOT-1.

Available NOW for just

£57.95 Each

The internal sensor measures between -20°C and 60°C, making the EL-IOT-1 perfect for measuring all kinds of storage areas, as well as offices, treatment and consultation rooms. Handy status indicators on the front of the device alert you, at a glance, to alarms, battery levels, and WiFi connection strength.

- Easy to set up using the EasyLog App
- Use your existing wireless network
- Set high and low alarm levels with sounder, email and text notifications
- Data is encrypted and secure
- Can run for 1 year, on standard AA batteries
